Summary

Results-driven Software Engineer focused on building scalable, user-centric web applications, with a strong ability to quickly learn new technologies and continuously improve workflows to deliver impactful solutions.

Experience

Full Stack developer

Jovera Group

At **Jovera**, I built both **static and dynamic websites** and integrated them with **CRM systems** to streamline data flow, improve system design, and enhance overall business efficiency.

12/2025 – Present

Abu Dhabi

Senior Software Engineer

Quixas Technology

- Developed a **custom booking engine** using **WeWeb, Xano, Node.js, Bed2 API, and Stripe**, increasing rental revenue by **30%+** while automating workflows to cut manual data entry and staffing costs.
- Implemented **AI-powered automation workflows** with **n8n, LangChain, and OpenAI APIs**, including SDR automation and **RAG-based chatbots**, driving **30% revenue growth**.
- Led the end-to-end development of **LuxeReply AI**, a SaaS review management platform, and secured **\$250K in seed funding** by validating product-market fit.
- Built **Extreme Extract AI**, a **RAG-based construction SaaS platform** delivering real-time cost and duration estimates, reducing client delays by **50%**.
- Built **static and dynamic websites** using **custom code and low-code platforms**, including **Python, JavaScript, WordPress, WooCommerce, WeWeb, and Xano**.

07/2023 – 11/2025

Remote (Head Office:
UAE | Islamabad,
Pakistan)

Intern Software Engineer

Bytewise Limited

- Gained hands-on experience in MERN stack (MongoDB, Express.js, React.js, Node.js) through real-world projects.
- Built full-stack applications with CRUD operations, REST APIs, and responsive UIs.
- Managed authentication, state handling, and database integration.
- Implemented state management, authentication, and database integration in MERN applications, resolving critical bugs and ensuring smooth user authentication and data handling.

04/2023 – 06/2023

Islamabad, Pakistan

Education

Bachelor's in Software Engineering

Comsats University Islamabad (CGPA 3.0/4.0)

- Among top 10% of batch

08/2019 – 07/2023

Islamabad, Pakistan

- Relevant coursework: Data Structures & Algorithms, Database Systems, Web Development (MERN, PHP, Laravel), Data Science, AI, ML, OOP, Software Engineering

Low-Code & Automation Platforms

Wordpress, Shopify, wooCommerce, WeWeb, Xano, n8n, Make.com, Zapier, Bubble.io, Webflow

Frameworks & Libraries

Node.js, Express.js, React.js, Django, Laravel

Cloud & DevOps

AWS (S3), Docker (basic), Git, CI/CD

Programming Languages

JavaScript (ES6+), Python, PHP, SQL, HTML5, CSS3

Databases

PostgreSQL, MongoDB, MySQL

Expertise

Web apps development, SaaS Development, API Integration, Workflow Automation, RAG-based AI Systems

Languages		
English	Urdu/Hindi	Punjabi
Fluent	Native	Native

Runner-up, Visio Spark Coding Competition (2023)

COMSATS
